

3503 EZ Slide

Surgical Table

Simplify full body imaging and patient positioning

Featuring convenient top slide and the highest table height in our portfolio, the 3503 EZ Slide is designed with the surgical team in mind. Imaging and surgical access is easy with 21" of top slide, allowing for movement of the patient through the imaging window with just the click of a button. With a high height of 43", the 3503 EZ Slide gives comfortable working access to a broad range of specialties.

Imaging Efficiency

With 21" of top slide, the 3503 EZ Slide makes full body imaging convenient. A simple click of a button effortlessly moves the patient toward the C-arm, eliminating the need for risky repositioning. The table also features a slim profile base that stays clear of mobile imaging equipment.

Surgical Positioning Flexibility

The 3503 EZ Slide makes positioning and setup a breeze with a removable leg section. This can quickly integrate with accessories such as the optional 40" carbon fiber extension. Sturdy, standardized side rails accept most table accessories and preprogrammed positioning options allow for one-touch maneuvers at any point throughout the procedure.

Improved Patient Safety

The 3503 EZ Slide takes the confusion out of weight limits. The 3503 EZ Slide can provide top slide at full weight capacity, which means the table will support articulation capacities up to 600 pounds — even while sliding the patient through the imaging window.

3503 EZ Slide Series

21" Top Slide, General Purpose Table

Providing 21" of top slide, the 3503 EZ Slide takes the work out of imaging setup. At the click of a button, the patient is moved through the expansive imaging window.

Differentiating Features

- 21" top slide
- 7½" slide to head and 13" slide to foot
- 700 lb lift and 600 lb articulation weight capacity
- Removable head and leg sections for quick accessory attachment and positioning
- Durable stainless steel base is easy to clean
- 25" - 43" adjustable table height
- 20° lateral tilt
- 30° Trendelenburg and 30° reverse Trendelenburg

Convenient and Comfortable Imaging Access

The 3503 EZ Slide will offer 21" of top slide at its full articulation weight capacity. Designed to give comfortable, waist-height access to taller surgeons, the table offers our maximum table height of 43". As the table top slides toward the foot end, the head section can be conveniently detached and repositioned as a foot extension.

The 3503 EZ Slide also brings confidence to the operating room. Recognized for their reliable performance, Skytron surgical tables are consistently rated as having a lower cost of ownership.

Back lit one-touch positioning functions include Trendelenburg, tilt, and more

Battery life/diagnostic indicator

Easy to use clip style power cord

Back-up controls for emergency situations

Optional 40" carbon fiber leg section for lower body imaging

Self-leveling brakes for stability on uneven floors

One-Touch Pendant Control

- Simple one-touch operation
- Backlit control for high visibility in low lighting
- Audible alarm for kidney bridge, back up articulation and top slide obstruction
- With PSR (Patient Safe Return)
- Recessed buttons prevent accidental activation
- Durable and water resistant
- Can be used in conjunction with optional three function foot control
